# SAVE ON HAY, VET BILLS AND TIME!

I love this thing!  
No more wasted, trampled hay on the stall floor!  
It's super easy to fill, no mess and you can hang it low so horses can eat from a more natural position.

Cynthia W., DVM  
Springfield, MO

Health E-Z<sup>TM</sup> Hay Feeder

## HEALTHY FOR YOUR HORSE

- **Slows** consumption and improves digestion of hay when hung swinging free.
- Helps to reduce incidences of sand colic, ingestion of parasites and inhalation of ammonia and dust.
- Great boredom buster keeps you horse nibbling on hay for hours.

What a great product! Our mare needs her hay wetted down. When I saw the feeder I just had to have one! It's easy to use, holds plenty of hay and the horse LOVES it!

Beth T.  
Lexington, VA

## THE SAFEST

- Carabineer (snap) acts as a safety release.
- Smooth, rounded edges reduces cuts and abrasions commonly left with other hay feeders.
- Solid top keeps rain, snow and hooves off of the hay.
- Designed to hang from ceiling and swing freely. Can be hung from a tree branch also!
- Portable and adjustable low to high hanging positions.

The Health E-Z Hay Feeder is simple, sturdy and safe. It has completely replaced my need for conventional hay nets. They are easy to fill and hang; and I no longer worry about my horses putting a leg through half-empty, sagging hay nets. I even have one that lives in my trailer!

Katie Monahan Prudent

Rider and Coach

## SMART CHOICE

- Solid bottom keeps hay in feeder and off ground.
- Won't rot or decay. Easy to clean and sanitize.
- Resistant to extreme temperatures.
- Easy to load hay - it's a snap!
- FDA Food Contact Safe recyclable plastic – American Made.
