LESS WORK & WASTE

Portable, easy-to-fill design is perfect for stalls, trailers, paddocks and picket lines – anywhere you feed hay!

SAVE ON HAY, VET BILLS AND TIME!

I love this thing!
No more wasted, trampled hay on the stall floor!
It's super easy to fill, no mess and you can hang it low to the ground so horses can eat from a more natural position.

Cynthia W., DVM
Springfield, MO

SAVE
Health E-Z Hay Feeder

THE SMARTEST

- Saves money by conserving hay
- Solid top keeps rain and snow off hay
- Solid bottom captures smaller pieces of hay for eventual consumption
- Hay stays in the feeder and off the ground! Less mixing of hay with bedding, manure, mud and snow
- Quick and effortless to fill, carry, lift and hang anywhere
- Great for trailering
- Made from FDA Food Contact Safe recyclable plastic
- Withstands extreme temperature fluctuations and heavy horse play
- Design minimizes hay waste and loss

THE SAFEST

Break-away caribeaner or snap acts as a safety release to protect your animals

Smooth rounded thick edges prevent cuts and irritation to skin

Slow feeder - small 4" portals slows consumption; Nature's way of grazing improves digestion

Reduces ingestion of microorganisms and parasites; reduces incidence of sand colic as well as ammonia inhalation because hay stays in feeder and off the ground

Most convenient to soak hay – Load, Dunk & Drain

Will not mold or rot, easy to clean and sanitize – use soap, detergent, or disinfectant and rinse

Designed to hang and swing freely. The feeder encourages natural neck grazing position, which maximizes respiratory health, reduces improper molar wear, and facilitates correct neck muscular development

Hay accessible from all sides keeps one or several horses entertained for hours – Great boredom buster

The Health EZ Hay Feeder is simple, sturdy and safe. It has completely replaced my need for conventional hay nets. They are easy to fill and hang; and I no longer worry about my horses putting a leg through half-empty, sagging hay nets. I even have one that lives in my trailer!

Katie Monahan Prudent

Rider and Coach

What a great product! Our mare needs her hay wetted down. When I saw the feeder I just had to have one! It's easy to use, holds plenty of hay and the horse LOVES it!
